Independence Day Celebrations

The 65th Independence day of India was celebrated with full fervor and zest at IIM Lucknow on 15th August 2012. The day started with flag hoisting by the Director, followed by rendering of National Anthem. This was followed by the Director's speech and cultural programme by IIML students.

Later in the day the Employee Welfare Committee (EWC), IIM Lucknow organised various sporting events for the IIML Community members. The events included : *Jump like frog race for children upto class 1, 50 mtr race for children from class 2-4, 100 mtr race for children from class 5-7 and Solve the puzzle during race for children from class 8-12.*

Events

Aarohan 2012

The IIM Lucknow chapter of Spic Macay chapter provided an opportunity to all talented artists in IIM Lucknow student community to showcase their talent. Aarohan 2012 was organised on August 22, 2012. The audience witnessed Hindustani Classical Vocal performances, classical Indian dance performances like BharatNatyam, Kathak etc, folk dance performances like Bhangara etc.

Books & Book Chapters

Mital Amita, "Cases in strategic Management Volume II", Tata McGraw Hill Education Pvt. Ltd, New Delhi, pp:237, Rs 450.00, ISBN: 13:978-1-25-900511-4, ISBN: 10:1-25-900511-9

This second volume of cases in Strategic Management has contemporary cases covering topics such as Corporate Strategy, Vertical Integration, Globalization, Change Management, Strategy Implementation, Strategic Alliance and Innovation. Experiences are drawn from some world leaders such as Rajesh Exports and Karuturi Global, other well know organizations including Piramal Glass, BILT, Cybermedia India, Bharat Forge, Biocon, Hindusthan Musical Products, Pidilite, Bank of Baroda, Tata and Starbucks.

Papers

Shalabh, Garg, Gaurav & Heumann, C. 'Performance of Double k- class Estimators for Coefficients in Linear Regression Models with Non Spherical Disturbances under Asymmetric Losses', *Journal of Multivariate Analysis*, 112, 2012:35-47

The risk associated with the estimators of the family of feasible generalized double k - class estimators under the LINEX loss function is derived in a linear regression model. The disturbances are assumed to be non-spherical and their variancecovariance matrix is unknown. A simulation study is conducted to study the risk of some important estimators in the family of feasible generalized double k-class estimators.

Conference/Seminar Publications

Singal, Ajay. K., & Jain, A. K., "A conceptual positioning matrix for firms in developing countries: A case of India", presented at and published in the Proceedings of the 54th Annual Meeting of Academy of International Business, held in Washington, DC from 30th Jun-3rd July, 2012

Understanding and mapping global competitiveness of firms in emerging markets has been a burning issue for scholars and consultants in recent times. McKinsey suggested 'strategic control map' (SCM) that looked at market capitalization - using two parameters of book equity (size) and price to book ratio (performance) as key driver of competitiveness of firms. However, this mapping leaves important gaps. SCM, formulated with a developed market focus, is not suitable in emerging market context and does not consider internationalization as a key driver. In this paper, we suggest a fresh framework 'Global Competitiveness Matrix' (GCM) to further augment the understanding about relative comparison of competitiveness of firms in emerging markets and developed contexts. Using the case of large cap firms based in India, we argue that 'international intensity' and market capitalization can be important measures to map the relative paths of growth. The paper also provides important leads for further research.

Keywords: Global Competitive Matrix(GCM), Internationalization, Vulnerability.

Saji, K.B. & Mishra, S. S. "Antecedents and Consequence of Brand Extension Intent in B2B Market: Conceptual Framework with Research Propositions". Paper presented and published in the refereed proceedings of the 2012 Academic Conference of The Institute for the Study of Business Markets, held at Gleacher Centre, Booth School of Business, University of Chicago, IL, USA during August 14-16, 2012.

Make to order and the resulting commoditization characteristics of the business market have reduced the scope of product branding in industrial marketing. However, the corporate brand extension has increasingly become a preferred strategy to launch new products and services in business markets owing to the high failure rate of new product launches. The extant research on brand extension has evolved around the customer evaluation of brand extension primarily in the context of consumer markets, and investigated the relationship between perceived fit of brand extension to parent brand and the customer's attitude toward brand extension. It has been observed that the studies investigating the brand extension in the context of high-technology business products are very scarce, and no prior study has so far attempted to explore the motivation behind a firm's intention to extend its corporate brand in business markets. In order to address this critical research gap, an exploratory research has been conducted in the generic context of business-to-business high-tech product marketing. With the support of a conceptual framework, the present paper reports the potential antecedents to corporate brand extension intent and the perceived influence of the same on business value creation.

Mishra, S. S., & Saji, K.B., "Moderating Role of Dominant Design in New Product Commercialization: Empirical Evidence from Global High-tech Industry". Paper presented and published in the refereed proceedings of the 2012 Academic Conference of The Institute for the Study of Business Markets, held at Gleacher Centre, Booth School of Business, University of Chicago, IL, USA during August 14-16, 2012.

A firm's choice of specific technologies for a new high-technology product development (NPD) process is significantly influenced by its own contingencies, which results in the variation in technology selection criteria at firm level. It has been observed that the prior researches on aggregate modeling of technology acquisition for NPD are completely oblivious of these firm-level differences in technology choice-making. Although prior researches have tried to explain the causes and mechanisms behind the technology changes at industry and firm level, no study has so far comprehensively examined the exact link between technology acquisition intent and new product commercialization in the Stage-Gate system of NPD process with specific reference to the role of dominant design in the NPD process, which has been the prime motivation for conducting the present study. The paper presents a research model with empirical evidences brought forward from the generic context of global high-tech industry, which have significant implications to business-to-business marketing theory and practice.

Working Papers

Chandra, Saurabh, Srivastava, Samir K. & Srivastava, Rajiv K. 'Outbound Logistics Management Practices in the Indian Automotive Industry', IIML WPS 2012-13/06,

The purpose of the present study is to understand the logistics management processes and practices specific to outbound logistics of automobiles, as practiced in India. The paper opted for an exploratory study. A two-step approach was followed. In the first step an exhaustive literature review on outbound automotive logistics management was carried out. In the second stage, semi-structured interviews of 10 middle and senior level managers in the outbound logistics division of three prominent auto-manufacturers in India and two International Logistics Service Providers were conducted in multiple sessions. The data was complimented by important industry and consulting publications in this area. The complete outbound logistics of automobiles is divided into a set of interlinked functions based on a logistics framework and described accordingly. Based on the findings from the exploratory study and extant literature in this field, a conceptual framework for the stage-wise development of integrated logistics management practices in the automotive industry in India is derived.

Keywords: outbound logistics; automotive industry; conceptual framework; logistics management; logistics service provider

Editorial Assignments

Prof.Saji K.B.Nair served as reviewer on the editorial review board of the conference proceedings of the American Marketing Association's (AMA) 2012 Summer Marketing Educators' Conference held at Chicago, IL, USA during August 17-19, 2012. He worked for the 'New Product Design and Development, Product Management and Entrepreneurship' track.

Other Assignments

Prof. Saji K. B. Nair delivered a research colloquium on "Exploring the Strategic Role of Chief Technology Officer in High-tech Product Marketing Firms: A State-of-the-art Review and Research Agenda" at Booth School of Business, University of Chicago, Hyde Park, Chicago, IL, USA on August 16, 2012

Prof. Roshan Lal Raina was invited to make a presentation in the 53rd Entrepreneurship Summit, organized by Franchise India in Lucknow, during August 28-29, 2012. The topic of the presentation was Catalyzing Entrepreneurship.

Prof. Roshan Lal Raina delivered a Keynote address 'Chaging Role of Information Professionals: Passive to Proactive', in the inaugural function of the National Seminar on 'Ranganathan's Vision on Future Libraries', organized by Babasaheb Bhimrao Ambedkar University, Lucknow, on August 12, 2012

Dr. Sanjay K. Singh has been invited to be a member of the Indian research team to undertake a research study on "Global Mobility Monitor Network" initiated by the Institute for Mobility Research, Munich. The Institute for Mobility Research is a research facility of the BMW Group established in 1998. The research project is aimed at BRIC countries along with Germany and USA

IIM-L students pick up the brush for a cause

ht SPECIAL

Rajeev Malik

malik.rajeev@hindustantimes.com

LUCKNOW: Over 120 students of Indian Institute of Management here are playing with colours these days, busy preparing for an unusual assignment.

Part of the training to better their negotiation skills, they are tasked to harden whatever they paint—good or bad, serious or sprightly—at a city mall for no less than ₹100.

Little wonder, there is palpable excitement among the students, most absolute novices, for the D-Day (Sunday) at Fun Mall, when the hotfall is more

than weekdays.

These students of strategic business negotiation elective course are required to paint anything on a canvas measuring 14 inch x 8 inch. Those who are really bad have the licence to get a little help from their friends. But help of any professional painter is a big no-no.

The catch phrase: negotiate to get more money than the base price (₹100), but anything less than that won't do.

"The students will have to bring transaction certificate duly signed by the buyers with his contact number so that it can be checked and verified that students have actually sold it to somebody," says course coordinator Prof Himanshu Rai.

IIM-Lucknow students busy in their painting assignments.

PHOTO COURTESY IIM-L PHOTO CLUB

IIM-L students expect to generate more than ₹20,000 and the money will be given to those engaged in looking after senior citizens.

Explains Soumik Chakrabarty, a student: "This is an out-

let of the box idea of our professor and we are busy to give our best shot for this noble cause. Though I'm not good at it, I'm trying my best."

Sensha, another student has no reservation in saying that he

would seek help of a friend who is really good with the brush.

"The course pedagogy involves getting students to negotiate a real-life situation. In this case, students are required to convince the buyers to purchase their work at a price so that they may help elderly citizens. The process involves collaborative methods to reach an agreement. There is no room for arrogance or use of foul words," says a senior student.

Last year, the student of this course had suggested various ways to end the stalemate between Team Anna and the central government as a part of a classroom exercise, learning ways to hone their negotiating skills.

हाथों-हाथ बिकी प्रबंधन छात्रों की पेंटिंग

● अमर उजाला ब्यूरो

लखनऊ। आईआईएम में प्रबंधन का गुरु सीखने के लिए प्रवेश लेने वाले भावी प्रबंधकों ने नेक काम के लिए पेंट और ब्रश उठाने से भी गुरेज नहीं किया। पिछले दिनों कैम्पस पर अपनी क्षमता के हिसाब से कलाकृतियां उकेरीं और एक एनजीओ की मदद के लिए रविवार को फन मॉल उसे बेचने पहुंच गए। शहरवासियों ने भी उनकी सोच को खुले दिल से सराहा और दिल खोलकर पेंटिंग खरीदी। कुछ को तो न्यूनतम मूल्य से कई गुना दाम मिले।

आईआईएम में स्ट्रेटजिक बिजनेस निगोसिएशन का एक ऐच्छिक कोर्स संचालित है। इसमें 120 प्रबंधन के छात्र-छात्राएं पंजीकृत हैं। कोर्स को-ऑर्डिनेटर प्रो. हिमांशु राय ने बताया कि इसमें प्रबंधन छात्रों को व्यवसाय की रणनीति और तोल-मोल की बारीकियों से अवगत कराया जाता

● आईआईएम के छात्रों ने चैरिटी के लिए फन मॉल में बेची कलाकृतियां
● स्ट्रेटजिक बिजनेस कोर्स के अंतर्गत दिया गया था टास्क

फन मॉल में रविवार को अपनी बनाई पेंटिंग बेचते आईआईएम के स्टूडेंट्स।

है। इस बार सभी छात्रों को पेंटिंग बनाने तथा उसे बेचने का टास्क दिया गया था। इसको न्यूनतम 100 रुपये में बेचना था, जिससे मिलने वाली धनराशि को वृद्धों के लिए काम करने वाली संस्था को सहयोग राशि के रूप में प्रदान किया जाएगा। इस कड़ी में रविवार शाम आईआईएम के छात्रों ने

अपनी पेंटिंग के साथ फन मॉल में पहुंचे और अपनी विक्रय क्षमता का परिचय दिया। कई छात्रों को अच्छे दाम भी मिले।

प्रभा राय ने प्रकृति पर आधारित पेंटिंग बनाई थी, जिसके लिए उन्हें 1500 रुपये मिले। विशाल चौधरी और उर्वशी गोयल ने 600-600 जबकि हरीश और धीरज ने 500-

500 रुपये में पेंटिंग बेची। छात्र-छात्राओं का कहना था कि अच्छा उद्देश्य होने के साथ ही आईआईएम का ब्रांड उनके काफी काम आया और लोगों ने उनकी पेंटिंग को तवज्जो दी। पिछले साल अन्ना एवं सरकार का गतिरोध सुलझाने का छात्रों को टास्क मिला था।

prominent mode of...
communication...
Despite this...
evolution, Internet...
at its core still...
remains a platform for...
people to share their...
ideas, knowledge and...
opinions with the world. It...
was the Internet...
newsgroups in the 90's...
blogs in the past decade...
and the pervasive social...
media in this one. Unlike...
other media, the lines...
between content...
generators and the end...
consumers are really...
blurred as Internet is...
easily accessible to...
anyone. It has become a

Saxena for the masses to express themselves and

this censoring this...
medium is...
essentially cutting...
one's freedom of...
speech...
Internet played...
a major role in...
expanding the...
journalistic...
revolution. It gave...
a channel for...
outburst of the...
discontent...
prevalent among the...
people. Ultimately it was a...
platform for people to...
communicate and...
censoring it did not...
achieve anything. Internet...
in Libya has always been...
regulated but it couldn't...
stop the revolution from...
spreading across the...
country...
But can't the same...
platform be used by...
terrorists, anti-national...
elements, smugglers and...
other criminals to further

their cause? The answer is...
yes. But the path to...
stopping them lies in...
better use of technology...
something Google has...
demonstrated recently, and...
an efficient intelligence...
service. Censoring the...
internet would only result...
in pushing the innocent...

Career BUZZ

'It's not just CAT alone'

It is not just academic performance, but more than that. SANJITA SINGH talks to Dr Devi Singh, Director, IIM-Lucknow and knows what it takes to get into a B-School like IIM...

What sets IIM's apart from any other management colleges? IIM's are institutions that stand out in how they do and what they do in terms of education, philosophy, processes and teaching methodology and best faculty that they are able to attract. All academic and other infrastructures are indeed of good standard at any B-School.

What sort of learning environment is provided here that also imparts holistic development of a student?

Teaching and learning processes are highly interactive here. The focus is more on learning outside the classroom, the teachers also have more involvement with the student community, there are different co-curricular activities, programmes are held with the corporates and NGOs and other social organisation. This all together gives an opportunity to develop with a broader perspective.

Recently, it was in news that now-a-days, companies prefer to recruit just graduates than MBA's. What's your view on this?

Recruitment is a serious exercise at any level. Recruiter looks at the knowledge, skills and attitude related to the job. It's not MBA Vs graduate but perhaps the feeling that corporates find it easier to train graduates on their own and get MBA candidates with less quality and caliber, passed out from any institute. These candidates are with misplaced perception and mismatch in their preparedness as per to the requirement of a recruiter.

What are the global challenges that B-Schools are facing today?

B-Schools are facing tremendous challenges today. After 2008, a lot of questions were raised in terms of

Dr DEVI SINGH

how management education is imparted and the way business schools are set-up. Because management can't be taught in a series environment setting without bringing societal issues and

B-Schools are facing tremendous challenges today. After 2008, a lot of questions were raised in terms of how management education is imparted and the way business schools are set-up

concerns and other obligatory issues that need to sensitize; therefore, questions are raised that the management students become too

analytical, always find solutions to problems and become too number conscious.

What is the distinctive feature that can help a student to crack CAT and get into IIM?

The first and foremost thing is that no block be should be entertained in one's mind that I can't get into IIM. Not only academic performance of a student is important but many attributes are there. For instance, what one has achieved beyond one's academics, situations in organisations and how well aware a student is with the situation around and also knowledge of the global issues is mandatory. It is an all rounded picture. Cracking CAT is important but it's not just CAT alone.

What is your vision for IIM-Lucknow?

Well, I want IIM-L to be a thought leader in management. It should be able to provide cutting edge education with strong values that prepares students for future in a global environment.

Please tell us something about yourself.

I did MA in Economics. I also pursued PhD Fellowship programme from IIM Ahmedabad. Then I took teaching as a career. Before joining IIM-L, in August 2003, I was the director of Management Development Institute, Gurgaon. Before that I served as a professor at Mc University, Canada. I have worked with different corporates and government bodies. I have been consultant with many public, private and multinational organisations in India. I also have been the president of Association of Indian Management Schools.

THE DIGITAL EDGE!

Education Times speaks to experts from various streams in the education industry who share their views on the role of technology in education today...

Technology in education is becoming critical not as a delivery tool but also in terms of protecting knowledgeable resources and interface. Given the faculty shortage in our country now, technology could come to our rescue. Technology is something that can be accessed easily by the students. With the coming of smart classes, e-books and online education, it has become easy to understand the theoretical concept and pursue higher education. The smart classes provide audio and content for interactive self-paced learning guided by teachers. The audio-visual stimulation coupled with freedom to manipulate and modify the lessons as per individual needs paves way for an easy learning and understanding. Those who are working or can't pursue regular classroom study, technology is a boon for them. In fact, there are many online management courses also that are now recognised and even accepted by the MNCs etc. With the advent of online delivery of lectures and live chat sessions, students find themselves in a comfort zone while interacting with the teachers available online. The students find easy to communicate their doubts. So, technology has opened many options for the students today.

Dr. Devi Singh
Vice-Chancellor, CMMU

The advancement of technology in education has taken place with a rapid pace. And when it comes to medical education, advancement took place mostly during the past 100 years. The technologies in the medical field are evolving very fast; doubling almost every 3 years, putting tremendous pressure and challenges. Various technologies like tele medicine, web working and internet have become part of day-to-day life of the medical fraternity with the distinct advantages for e-learning, teaching and communication. Though the new advancements are not free from risks and disadvantages, yet students are depending more on computers and internet information rather than to be attentive in classrooms. The attendance is already depleting in clinical lectures. And this is a serious matter. But then, newer technologies help to modify the teaching methods to involve the students to register the information. For instance, the use of instrumental technology offers alternatives options to the students and faculty of the teaching institutions, in absence of the facilities available at many places. Technology only helps to keep pace with development and progress for the benefit of the students.

Prof. Dr. DE Gupta
Vice-Chancellor
CMMU

Technology today has revolutionised the way the learning. It has enhanced the grasping power and given a wider reach to access the knowledge world-wide. From smart classes to video-conferencing, online lectures to online courses, there are host of benefits of staying connected with the technology. Not only it has helped to make the learning process simpler and fun loving, it has also introduced students to thrilling, exciting and amusing way of learning, preparing notes and completing their assignments. The role of information technology is expanding day by day. In the age of e-learning, the student community aims to exchange ideas on innovative teaching and learning suggestions. Online brainstorming session helps to overcome challenges and share their learning experiences. By blending technology in education, one can witness a dramatic change in the pattern of education delivered to students. Besides enhancing the multi-sensory learning in classroom, it also helps to improve the academic performance of students and enable an instant assessment of learning outcomes in the class. It also gives a break to the teaching faculty, who otherwise, rely on traditional way of teaching the students via chalk and blackboard method. Indeed, with technology spreading its tentacles, the books are replaced by e-notebooks, graphs and charts are replaced by graphics, animations, 3 D images and video-clips and many more.

Rishi Shanker
Vice-Chancellor,
Gautam Buddha Technical
University

Information Technology has altered the way we live, think, behave and interact with each other. It has brought in an era called Knowledge Era enabled by Knowledge workers. Familiarisation with IT is imperative in the pursuit of learning/knowledge and power of the connected and enlightened world community is beginning to unveil. Access and universality of IT have far-reaching consequences for the governments worldwide in their endeavour to bridge the gap - called the Digital Divide - between people who have and who do not have access or capability in the use of IT. It offers plenty of resources to enhance the teaching skills and learning ability. In the age of computers and internet the pace of imparting knowledge is very fast and one can be educated anywhere anytime. Findings suggest the value of audio-visuals in the educational process. Integration of IT in teaching improves its quality, makes it more effective and helps in getting an employment. Internet supports thousands of different kinds of operational and experiential services, one of which is online library. Education through distance learning has taken unprecedented expansion aided by communication technology. It has brought drastic changes in the life of disabled children. It provides various activities and techniques to educate these people.

BK Mahindroo
PNNMT

I firmly believe that in today's world, the growing importance of technology in education cannot be denied. In fact, it is the technology that drives the scientific research and education. Being a scientist, I dream to see Banarus Hindu University (BHU), as a resource centre of scientists working in cohesion and collaborative environment with all technological facilities. I want to develop a centralised research facility to conduct various scientific researches at one place with multidisciplinary collaboration approach so that no worthwhile idea goes waste. Today, technology is very expensive, hence the idea is that people from different fields of science can use the centralised research facilities for a prosperous future. Right from the schools to the institutional level, technology has brought about a huge transformation in the education system that exists today. Gone are the days when teachers depended on the conventional ways of teaching. With video-conferencing, online chatting and so on, it has become the latest mode of delivering lectures. It provides a common platform for students and teachers alike to discuss on a common topic.

Dr. Lalji Singh

In the digitized age, the uses of digital technology are unlimited. Let us start with the use of this technology within the classroom. The Power Point Presentation (PPP) makes the lecture interesting, easy to understand and available to the student 24x7. In fact, many books, particularly published in the U.S.A and the U.K. come with the PPP already prepared for the teacher. Thus teachers across the globe using such a book can use the PPP during the lecture. Further, online tests can be conducted for continuous assessment of the student. Many dictionaries come with the CD and it becomes easier for a student to assess a word from the CD.

In addition, with the invention of video-conferencing, it has become very easy for a lecturer to be telecast across cities and countries. This has a great utility and potential for distance learning, which can have the same content for a large number of students. This can also reduce the isolation of a student learning through the distance mode. Now we have online versions of several books available. So if a library subscribes to an online edition of a book, several students and faculty can access the same book at the same time. Finally, the digital board has all the features of a PC or laptop but has a bigger size of a blackboard and therefore it can make the class room more interactive.

IIM-L students show the art of negotiation

NOBLE INITIATIVE Students sell their paintings, money to be used for welfare of elderly

HT Correspondent
@hindustantimes.com

LUCKNOW: Selling a comb to a bald person is what marketing is all about. And who knows this better than the students of the Indian Institute of Management, Lucknow.

On Sunday, the students of the prestigious management institute sold their paintings to people visiting Fun Republic Mall for as high as ₹500, ₹600 and ₹300 — much above the base price of ₹100.

The cause behind these drawings and 'Brand IIM-L' helped them negotiate with the buyers easily. The sales proceeds will be used for the well being of senior citizens. The initiative was part of the Strategic Business Negotiation Elective Course of IIM-L, wherein students sold their creativity to people for the charitable cause.

"It was a test of their negotiation skills. They were asked to haggle whatever they draw — good or bad, serious or smirk — for no less than ₹100. This exercise helped students hone their negotiating skills," said Prof Himanshu Rai, course coordinator.

Prabha Rai sold her painting on nature for ₹1500 while her friends Vishal Choudhary and Urushi Goyal fetched ₹900 for their work. Harishanki Oberoi were lucky enough to sell their paintings (single and set of 2) for ₹500 each, much above the base price of ₹100.

Few other students were able to get between ₹200 and ₹450. But there were others who could just manage to get ₹100.

Two students — Sakshi Dandia and Neha — had a tough

IIM-Lucknow students selling their paintings at Fun Republic mall on Sunday. (Below) Students pose for the shutterbug with their paintings.

GOOD BUSINESS
IIM-L students sold their paintings to people for as high as ₹500, ₹600 and ₹300 — much above the base price of ₹100

IDEA BEHIND INITIATIVE
The cause behind these drawings and 'Brand IIM-L' helped them negotiate with the buyers easily. Over 120 students of the course were required to paint anything on a canvas measuring 14 inch x 18 inch. They were asked to use collaborative methods to reach an agreement with buyers.

FOR A CAUSE
The initiative was part of the Strategic Business Negotiation Elective Course of IIM-L. Students sold their creativity to people for the charitable cause.

THE CATCH PHRASE
Negotiate to get more money than the base price (₹100), but anything less than that won't do.

time selling their paintings. "It was part of our learning experience. The bitter pill was important," they said.

Sourav Chakraborty, a student, said: "This was our professor's out-of-the-box idea and we are happy to be a part of it.

We did our best to generate decent money for this noble cause which will be given to some NGOs."

'Annapoorna' serves good biz skills to IIM-L students

FOOD FOR THOUGHT With an annual budget of ₹3 cr and managed by a team of students, the mess is active for 20 hours a day

HT Correspondent

annapoorna@iiml.ac.in

LUCKNOW: 'Annapoorna', the mess of the Indian Institute of Management, Lucknow is a perfect example of good management skills of the students, by the students and for the students!

With its annual budget crossing ₹3 crore, the mess is run by a team of 12 students that manages a staff of 30 employees who, in turn, provide meals to over 900 students for 20 hours a day.

So what's the USP of this set-up? Recent changes include digitisation of the night mess billing process, tie-up with Bharti Wal-Mart for raw material procurement and performance-based incentives for the employees. Besides, a major project in the pipeline is a digitised inventory management system.

The students hope that these changes would bring down the operational costs, benefits of which can be passed on to customers.

The students' team comprises a mess secretary, a joint mess secretary and 12 mess committee members (8 senior students and four freshers). The team provides three meals and evening snacks every day besides operating a night mess, implementing strict quality standards to ensure that students are served healthy and hygienic food.

"IIM-L is a campus that never sleeps, with students busy throughout the day and night juggling academic, co-curricular and extra-curricular activities. Satisfying the hunger pangs of this community of over 900 students, is 'Annapoorna'—a non-profit organisation. It runs continuously for 20 hours every day—from 7 am to 3 am," said

USP OF THIS SET-UP: BY THE STUDENTS, FOR THE STUDENTS

- Recent changes include digitisation of the night mess billing process, tie-up with Bharti Wal-Mart for raw material procurement and performance-based incentives for the employees.
- A major project in the pipeline is a digitised inventory management system.
- Students hope these changes would bring down the operational costs.

THE TEAM

- The students' team comprises a mess secretary, a joint mess secretary and 12 mess committee members.
- It provides three meals and evening snacks every day besides operating a night mess.

• The mess provides meals to over 900 students for 20 hours a day.

Rakesh Kankavalli, mess secretary.

Running this mess is a part of learning process for the management students of this premier institute.

Student activities at IIM-L are organised through committees, which are teams of first and second year students responsible for organising events on the campus.

Managing 'Annapoorna' is not an easy task. It's a perfect example of implementing theoretical management concepts in day-to-day practical activities. Manu Hoysala, a mess committee member, states: "We learn theoretical concepts in class on HR, operations, finance, IT and marketing. Our team applies these every day in our operations. Working as a mess committee member has been an excellent learning experience."

Each year, many changes are made to improve 'Annapoorna'. According to the mess secretary Rakesh Kankavalli, in the last six months many changes have

been made by the team.

"We have to constantly improve our processes to ensure that we run efficiently and within our budget. The team is always looking to make improvements and enjoy the continued support of the IIM Lucknow

administration. The mess is an example of student-driven activities on the campus, which benefit the IIM-L community and enables students to hone their managerial and leadership skills," said Prof Satish.

Budding managers get a feel of rural-onomics

AT GRASSROOTS LEVEL With rural markets slated to be the battleground for cos, IIM-L is giving students a first-hand experience of village scenario

HT Correspondent

htl@hindustantimes.com

LUCKNOW: Union minister for steel Beni Prasad Verma may have stoked a controversy with his comment that price rise was beneficial for farmers. But a team of students from the IIM-Lucknow has observed that farmers are not gullible.

The budding managers are of the view that farmers understand the market forces better than most people in urban areas.

Eighteen second-year students of agri business management (ABM) course came to this conclusion while interacting with farmers during their visit to rural areas around the state capital. They undertook the exercise to understand the distribution and usage of agricultural inputs including fertilisers, pesticides and seeds.

During the daylong trip recently, the students of post graduate programme interacted with sales managers, distributors, retailers of agri-products and farmers to understand the different facets of distribution such as inventory management, sales and trade promotions, margins and channel conflicts and the challenges faced by farmers in purchasing agri-inputs. The students felt that farmers were particular about the quality of inputs.

IIM-L believes in giving its students the right exposure — be it in the corporate world or the rural sector. Understanding the rural sector is especially relevant now, with rural markets slated to be the battleground for companies vying for market leadership.

The interaction was an eye-

HANDS-ON TRAINING

Agri-business management students on the city's outskirts.

AGRI-BUSINESS MGMT

Field visits to rural areas are an integral part of the ABM course of IIM-L. These help students enhance practical learning through grassroots level exposure.

They spend a week's time with the farming community for whom they will be working in future. The idea is to generate awareness, propose capacity

building of the farmers and document case studies apart from data generation and research.

The entire exercise is divided into two modules - village study where the students are required to study the whole village through participatory research techniques, and thematic study where the students undertake pre-designed study in agribusiness related issues.

FARMERS ARE NOT GULLIBLE: STUDENTS

The budding managers are of the view that farmers understand the market forces better than most people in urban areas.

The second-year students came to this conclusion while interacting with farmers during their visit to rural areas around the state capital. They interacted with sales managers, distributors, retailers of agri-products and farmers to understand the different facets of distribution such as inventory management, sales and trade promotions, margins and channel conflicts and the challenges faced by farmers in purchasing agri-inputs.

opener for students. Mayank Khulbe, a second year agri-business management (ABM) student, said: "Farmers are price conscious while purchasing products such as mobile SIM cards. They also frequently change their service operator based on the best deal available. But on the other hand they are ready to pay higher prices for quality agri-inputs, as these inputs directly affect their source of livelihood. Therefore, the belief that all products have to be priced low for the rural market is a myth."

The field visits also served as a first-hand experience for

students vis-à-vis practical application of theoretical concepts. Anish Agarwal, another second year ABM student, said they got to how the colour of packaging plays an important role in rural sales. "We saw this being practiced by a brand, which specifically sold its neem-coated urea in yellow sacks, which influenced farmers to ask for the yellow pack urea," he said.

Next month, students will be visiting a rural area for one week where they will conduct a research project. Prof Jabir Ali of the Centre for Food and Agribusiness at IIM Lucknow,

who coordinates these rural visits, says: "Field visits are an integral component of our ABM curriculum. Students undertake live field projects in villages where they understand the ground realities, agricultural production system, local resources and constraints related to income and livelihood of the farming community."
